Corteva Agriscience is a leading global agriculture company driven by our purpose to enrich the lives of those who produce and those who consume, ensuring progress for generations to come. The company combines over two centuries of scientific achievement and agronomic expertise to provide farmers with the right mix of seeds, crop protection and digital solutions to maximize their yields and improve their profitability, while strengthening customer relationships and ensuring an abundant food supply for a growing global population.

Corteva is headquartered in the U.S., with European headquarters in Geneva, Switzerland. Spain's headquarters are located in La Rinconada, Seville, for the whole Iberian business organization, also home to a Multi-Crop Technology Center. Production facilities and service building are located in Valle de Tamón, Asturias. Manuel Melgarejo serves as the country leader for Corteva in Spain.

 Global HQ: Wilmington, USA
 Spain HQ: La Rinconada, Seville

Our Values:

Enrich lives: We commit to enhancing lives and the land.

Stand tall: We are leaders who act boldly.

Be curious: We innovate relentlessly.

Build together: We grow by working together.

Be upstanding: We always do what's right, maintaining high ethical standards and conducting business safely and transparently.

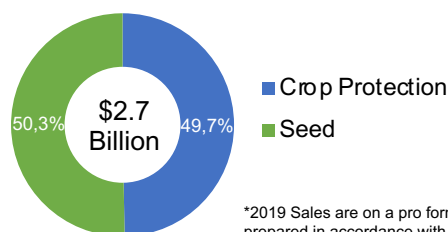

Live safely: We embrace safety and the environment in all we do.

PRODUCT OFFERINGS

Corteva is serving Seeds, Crop Protection and Digital Solutions for more than 40 crops in Spain and more than 50 active ingredients. For example:

- Crop Protection: New innovative molecules as Arylex™ and Rinskor™ herbicides, Isoclast™ and Spinetoram™ insecticides, Zorvec™ and Inatreq™ fungicides, Vellozine™ nematocide and several Seed Applied Technologies like Lumisena™, Lumiposa® and Lumivia™.
- Seeds: Optimum® AQUAmax® drought tolerant corn hybrids, Pioneer Protector® sunflower products, Omega 9 oilseed-rape, Rapid React® Inoculants.
- Digital: 50,000 ha of more than 1,500 farmers are monitored by innovative satellite images and remote sensing with drones.
